

I live in Phoenix, AZ, the 6th fastest growing metropolis in the U.S. So as the number of people continue to move here, the number of vehicles that are out on the road grow as well. Therefore it is vital that I can easily be made aware of any traffic issues. I am also in the military, so it is extremely important that I get to work on time. And I'm sure the same goes with any other XM listener.

It is the 21st century. As technology changes, most people adapt to those changes. NAB, face it.....satellite radio is here to stay.

Thank you.
